

Mentor for its song variety, artistic expression and sonic clarity, *Powerage* is favored by many aficionados to be AC/DC's most accomplished performance in a studio setting.

Recorded in Australia circa 1978, *Powerage* also ushered in a new era of sorts, for it marked the debut of London, England bassist Cliff Williams, whose driving, eighth-note bottom brought AC/DC's attack to full caliber. A quarter century later, Cliff's bandmate tenure is only surpassed by rhythm guitarist (and founding member) Malcolm Young and his lead guitarist younger brother, Angus.

As they had masterfully done on the band's prior albums, older sibling George Young and cohort Harry Vanda produced *Powerage*, their final turn as AC/DC studio recording collaborators during the Bon Scott era.

The production partners' keen musical savvy is immediately evident on the opening track, "Rock 'n' Roll Damnation," where tasty touches of horns and handclaps detail the semi-biographical tune's hip-shake groove.

With the tasty arranged, emotionally draining "Down Payment Blues,"

however, Bon Scott's impassioned singing and to-the-bone lyrics set a much darker mood.

"I got myself a Cadillac, but I can't afford the gasoline" are the sentiments of a man who rarely treads on middle ground.

"Doing nothing means a lot to me," though, could be the attitude of most anyone desperate for their own free time.

Angus Young's beautifully wrenching solo brings "Down Payment Blues" to a complete catharsis.

Love and loss are subject matter in "Gimme A Bullet," a mid-tempo ditty faced with the cantoring notes of Cliff Williams' bass guitar.

Bob's narrative approach to heartbreak, though, is hardly that found in maudlin prose: "Gimme a bullet to bite on, something I can chew, Gimme a bullet to bite on, and I'll make believe it's you."

Considered together, the middle three songs on *Powerage* — "Rif-Raf," "In City" and "What's Next To The Moon" — articulate a decibel-driven statement of paramount creativity and musicianship.

The stirring introduction alone to "Rif-Raf" is quite extraordinary. Angus' opening figure rises with Cliff's swelling bass to meet Malcolm's accelerated counter rhythm, which abruptly shifts into breakneck power chords alternating with the Young brothers'

trademark unison riffing.

The band lays back for Bon's verses, then slams into a higher gear fueled by Angus' rampaging solo. Amazingly enough, during the ensuing *Powerage* tour, AC/DC would actually start some concerts with the encore worthy "Rif Rif."

Faced by the signature groove of drummer Phil Rudd, "Sin City" relates a gambler's lust for "Lambourgeois, caviar, dry martinis, Shang-La" in a hopeless milieu where "ladders give, snakes take."

This skillfully arranged, deftly played masterwork is alive with integral AC/DC elements like Angus' fingerboard flashing lode, Cliff's blood pumping bass line, and Phil's kick drum/store Bon transitions, which have made "Sin City" another ace in the hole played in concert. The provocative "What's Next To The Moon" (titled "Next To The Moon" on early Australian *Powerage* pressings) is roughly a stream-of-consciousness poem structured quite unlike any other AC/DC song.

Accompanied by a guttural guitar chime woven through the meter of Angus' hard-rock woodie top-tom backbeats, Bon the bard recites, to the accompaniment of electric rickshaws such as "Flying across the sky, out of town. Come on, change your love, head down."

Angus' dramatic touch in "What's Next to The Moon" occurs in a dead voice, which Bon, Malcolm and Cliff sing together in distinct voices. "I'm a long arm looking for a signpost, trying to find the mystery, hitting me with the third degree, looking on a thumb screw."

As for the meaning of "What's Next to The Moon," Bon leaves only a hint with the guitar-aided closing whine: "If not the sky, oh baby, say bye-bye."

Sequenced as a relaxed respite, "Don't Start" is a loose, AC/DC styled foray into leaping R&B, punctuated by Angus' downright funky solo. "Up to My Neck in You," though, is a fairly characteristic pounding rocker. The title conveys an exemplary Bon Scott double entendre.

POWER

Fittingly enough, *Powerage* ends in overpowering fashion with the totally wired "Kicked In The Teeth," a culminating job of horsepower rock 'n' roll from an album that, at the very least, set AC/DC apart from other bands in 1978, and for all future years.
